

# Amit Vashisht

Frontend Developer

 [amitvashisht18@gmail.com](mailto:amitvashisht18@gmail.com)  Ghaziabad, Uttar Pradesh, India  [Portfolio link](#)

## Profiles

 [LinkedIn](#)  [Github](#)

## Summary

Frontend Developer with prior professional exposure to UI/UX and web projects. Currently focused on building frontend applications using React and JavaScript, with an understanding of UI implementation and collaboration with design requirements. Seeking frontend role to grow as a developer while contributing to real-world products.

## Projects

### To-Do App (Demo link)

- Created a to-do application using React and JavaScript
- Implemented add, edit, delete, and mark-complete task functionality
- Used React state and props to manage user interactions

### News App (Demo link)

- Developed a news application using React to display real-time news content
- Integrated a public news API to fetch and render dynamic data
- Handled loading states and basic error scenarios

### Kanban App (Demo link)

- Built a Kanban-style task management application using React and JavaScript
- Implemented task creation, status-based columns (To Do / In Progress / Done), and task movement logic
- Managed application state using React hooks (useState)

## Experience

### The Devil Works

UI/UX Design July 2024-December 2024

- Designed high-converting landing pages, enhancing user engagement and accessibility.
- Created an intuitive college dashboard, streamlining data presentation and improving usability.
- Designed a user-friendly mobile app, focusing on seamless navigation and modern UI aesthetics.
